

Hello there, thank you to download this content and I hope you will enjoy it. Although I work all of these and I hope you may understand it. I faced several things in life while I'm working on these Minecraft Bedrock Stuff so that you can enjoy, I did a lot of ways to support my work by selling it and also releasing it on any platforms such as patreon, planetminecraft, curseforge and so much more.

Thanks to all of those fellow minecraft players out there to support me a lot especially to my friends even they are not playing minecraft but they still support me a lot by reacting my work on any social media platforms.

Thanks a lot, to read this and have a good day to play with my addons.

Have fun ☺
